HCS-5100MC/32F	32 CHs Digital Infrared Transmitter

HCS-5100MC/40F
40 CHs Digital Infrared Transmitter

The transmitter is the heart of the HCS-5100Plus system. HCS-5100MC/40F accepts and modulates up to 40 unbalanced audio signals onto carrier waves which are transmitted to radiators located in the room. It can either be connected to HCS-8300M congress main unit through HCS-8300MO 8 Channels Audio Output Device, or be used as a stand-alone system for distributing external audio signals. HCS-5100MC/40F is suitable for either tabletop or 19-inch rack mounting using. Four feet (for tabletop) and two brackets (for rack mounting) are supplied.

Features

- **Compliant to IEC 61603-7 and IEC 60914**
- **Compatible with any other IR simultaneous interpretation system compliant to IEC 61603-7**
- **DQPSK digital modulation/demodulation technology**
- **Capable of distributing a maximum of 40 audio channels**
- **Conference hall privacy; the congress venue itself acts as a barrier to infrared signals escaping and being overheard, as infrared is unable to pass through opaque objects such as walls**
- **Suitable for various kinds (small/medium/large international) of conference halls and outdoor venues**
- **Transmitting in 1~8 MHz frequency band eliminates disturbance from high frequency lighting systems**
- **Each audio channel can be assigned a language name for easy identification**
- **Flexible configuration of channels and channel quality modes:**
  - **Mono, standard quality, maximum 40 channels**
  - **Mono, perfect quality, maximum 20 channels**
  - **Stereo, standard quality, maximum 20 channels**
  - **Stereo, perfect quality, maximum 10 channel**
- **Adjustable sensitivity for each input to enable fine tuning of audio levels**
- **Automatic synchronization to the number of channels in use by the system**
- **"Bypass" mode for distribution of signals from another transmitter allows multiple rooms to be used**
- **During adjournment, music mode can be used to feed music to all channels**
- **Independent test facility: self-generates diverse frequencies for system debugging**
- **Built-in infrared emitters in transmitter for audio monitoring in operating room**
- **With web control function, transmitter can be controlled through web page**
- **Universal mains power facility allows worldwide use**
